Project Design Phase-I
Proposed Solution Template

Date	19 september 2022
Team ID	PNT2022TMID52332
Project Name	**AI-powered Nutrition Analyzer for Fitness Enthusiasts**
Maximum Marks	2 Marks

S.No	Parameter	Description
1.	Problem Statement (Problem to be solved)	Some peoples find it difficult to learn new apps in this ever-expanding digital environment, and people nowadays people have been affected by illness. Here are tips to help and get nutrition for user needs.
2.	Idea / Solution description	Create a basic,easy-to-use app so that users optimize health and performance by personalized nutrition plan and learn how to optimize your diet for success.
3.	Novelty / Uniqueness	My research began with a series of inquiries directed at a variety of people in order to have a better understanding of their issues and give workout to improve your body fitness.
4.	Social Impact / Customer Satisfaction	I constructed these app based on the research findings from the user interview. They would be crucial to the rest of the design process.
5.	Business Model (Revenue Model)	By using the model,we can collect basic and some physical information about the person that helps us in showing relevant and profitable advertisements.
6.	Scalability of the Solution	As the model is integrated with cloud software,we can update the user experience without reinstalling a model and the person can physically fit.
